## OUTSTANDING PRIMARY SCHOOL IN Health and Physical Education

### GOULBURN STREET PRIMARY

At Goulburn Street Primary School the whole school approach to the development of students' health and wellbeing in terms of physical skills and promoting a healthy and active life-style is demonstrated in a variety of programs such as KidsMatter, Maths n Movement, Daily PE and Move Well Eat Well.

Goulburn Street Primary has a high level of engagement with the wider community, understanding that through collaboration and partnerships, students will have greater opportunities to learn as well as the reciprocal benefits for the school community.

The high level engagement, understanding and implementation of the HPE Curriculum is shown by being involved in the ACARA National Panel, as an intensive engagement school, and being part of the work samples project. HPE assessments are included in all student portfolios that help to move student learning forward.
