ACHPER TASMANIA

OUTSTANDING SENIOR SECONDARY SCHOOL IN
Health and Physical Education

ROSNY COLLEGE

The Rosny College Health, Physical, and Outdoor Education (HPOE) learning area has engaged more than 50% of the student body in a HPOE program over a long period of time. This is an exceptional result for non-compulsory subjects.

Rosny has some unique programs such as Maritime Operations, Outdoor Ed - Expedition, and Certificate II in Outdoor Education as well as bringing in extremely successful sport specific Athlete Development programs in Basketball and Soccer over the past two years.

The implementation of a Flipped Classroom model for Athlete Development, as well as a Gamification approach, Social Media Classroom and Google Docs has allowed HPOE programs to take the next step and push students to the next level as well as enhancing overall assessment and learning.
